

 **Abramson Cancer Center of the University of Pennsylvania**

Family History of Cancer

Your physician will ask you about any other family members that have developed cancer. There are many cancers that have genetic links. Take time to think about parents, grandparents, and siblings that may have had a diagnosis of cancer. Also note the approximate age at which these family members were diagnosed with cancer. This information may help your physician decide if genetic testing or counseling should be performed.

Name of Family Member	Relationship	Type of Cancer	Age of Diagnosis
